

# DRIVER ALERT

FRESNO AREA EXPRESS

44/2003

DATE: September 23, 2003  
TO: ALL BUS OPERATORS  
FROM: DEAN S. HUSS, Transit Operations Manager DSH  
SUBJECT: **i-STOP SECURITY /STROBE LIGHT SYSTEM**

Within the last week the Fresno Area Express shelter crew have installed *i-Stop Security/Strobe Light* devices at two bus stops. These stops are located on Route 32, Pottle and Kern, IB; and Route 22, Tulare and Willow, WB.

The *i-Stop Security/Strobe Light* devices are solar operated and are intended to be utilized during the evening hours. The device has a security light switch so that a potential passenger may utilize to light up the surrounding area while waiting at the stop. The strobe light switch can also be activated by the passenger to advise the bus operator to stop the bus.

These devices are being evaluated to determine their usefulness. If you have any comments or concerns, please forward them to Maintenance Supervisor, Arnold Napoles.
